Trans. of Ingenieur-Archiv (Germany) 1952, v. 20, no. 2, p. 67-72.	
DESCRIPTORS: *Gases, Gas flow, Turbulence, *Tur- bulent flow, Density, Jet mixing flow, Statistical proc- esses, Partial differential equations, Theory.	
The statistical approach after O. Reynolds is general- ized to apply also to fields with extremely variable density. On the basis of Prandtl's concept of the mix- ing path a system of equation is then established for the computation of the mixing processes. (Author) (Physics, TT, v. 8, no. 5)
